

Combining
the best in
analog and
digital
technology
for a unique
detecting
experience.

- 7.8 kHz frequency-- perfect for coin shooting, relic hunting and casual gold prospecting.
- Frequency shift for eliminating electrical interference and crosstalk.
- Advanced software-based motion discrimination with notch for searching trashy areas.
- All-metals autotune mode for deep-searching in non-trashy areas.
- Visual target ID by category & 0-99 indication, both discrimination & autotune modes.

- Target ID confidence bargraph.
- High-resolution manual ground balance with continuous ground balance readout.
- Ground balance range goes all the way to salt.
- Continuous display of ground mineral concentration and phase.
- Push-button static pinpoint with variable audio pitch and visual depth reading.
- Independent gain and threshold knobs provide complete control over sensitivity.
- Standard 10-inch elliptical concentric open waterproof searchcoil. Other coils available separately.
- Two 9-volt alkaline batteries (included) last approximately 40 hours.
